F 21

Fuel Factory F 21 is a leaded, oxygenated race fuel designed for superior detonation protection, increased burn speed, and consistent performance in demanding race applications. Originally developed for large cubic inch nitrous engines, F 21 has also been successfully used in NHRA Super Class racing, bracket racing, nitrous motorcycles, and snowmobile applications. Its oxygenated formula supports strong throttle response and efficient combustion, while its leaded octane package helps protect high-compression and power-adder combinations from detonation.

TYPICAL VALUES

Color: **Green**
Leaded: **Yes**
Octane – (R+M)/2: **117**
Motor Octane: **114**
Research Octane: **119**
Specific Gravity: **0.700**
RVP: **7.0**
Oxygenated: **4.75%**
A / F Ratio: **14.2:1**
